

Customized individual travels in Mongolia

Freedom is in the steppe, happiness is in the steppe (mongolian proverb)

e-Mongol.com LLC established in Ulaan Baatar – Mongolia, and operating through Internet, is born between web and steppes from a mongolian-french friendship and collaboration as well as a share of values belonging to these nomad lands respect, simplicity, tolerance and hospitality. We are convinced in the need for Mongolia's sustainable development and act as responsible actors to support this fragile dream comprising the nomads, their millenium culture and the infinite steppes.

Our touristic activities

Since 1999, we design, organize and guide individual discovery trips in Mongolia, especially in 4WD self-driving (unique in Mongolia !) but also in jeeps, treks or horse to meet the nomads, heirs of a culture of wind and sky.

Spécialists of customized service, we have never orgniazed the same trip twice et we have the skill to adapt to any demand from the most modest to the lost ambitious while sharing our rich experience of the countryside.

As an example, we just assured the co-organization of the **Bordeaux-Shanghai 4x4 raid** during its crossing of Mongolia in june 2004

We organize mostly **tours according demands from groups, already setted-up** : families, associations, friends while favouring the realisation of original projects and a respectul approach of the country. We have had an excellent feedback from our clients at that time and most of them became friends.

We offer a robust logistic as well as the listening, the flexibility and the support to live an unforgettable experience. We are service-minded and we are also dedicated to quality and security.

Dates, programs, rythm, centers of interest are at our traveller's choice, the only limit is their imagination, we care about the rest.

Discover, be moved, dream in full freedom and friendship : that's what we propose. The program is defined according the wishes ans possibilities of our travellers : meet the nomads pf the spteppes, the buddhist monks in their monasteries, ride, drive, and walk in the infinity, watch the birds, camp under stars, swim, fish, among other possible activities.

The rythm is our trips are customized, **no fix program or planning is imposed on these lands of freedom.**

Customized individual travels in Mongolia

Our travels are organized in the respect of people of Mongolia as well as a wild but fragile nature

Our expeditions

In the same spirit of designing original tours, we organize or support **scientific expeditions**, like the expedition of Centre Terre, the famous potholing team organized to seek and discover the larger and deeper cave of Mongolia (*cf National Geographic, juin 2001 et mai 2002*).

We also organize **humanitary or environmental trips**, especially by putting our logistic at disposal of operations to support nomadic families, like dispensing medicines and medical information.

Our website

We provide on our website a rich virtual gate to the country, its culture through general information, travel guide, news, photo galleries and web directory.

We aim to develop our activities under our domain name while providing more services, products and information on Mongolia to help in a better knowledge of this country under its different fascinating aspects.
